

### **ABSTRACT OF THE DISCLOSURE**

A method and system are disclosed for acquiring and transforming existing content (e.g., Hyper Text Markup Language HTML content) for display and execution on multiple platforms and architectures. In one embodiment, capture templates are created to harvest content from disparate content sources on multiple platforms. Data is extracted from the content from the disparate content sources using the created capture templates that drives extracting process. A standardized data stream is generated from the extracted data. The standardized data stream is provided for display on one or more different type of platforms.
